THE BITS AND ATOMS PEN

BAP is a complete tool to express, design and fabricate your ideas. It's inspired in "Bits and Atoms" concept and ergonomics. It's designed to brings an intuitive interface between humans and technology and all the benefits of digital fabrication. It has three main features to manipulate digital and physical world.

by Roberto Gallo

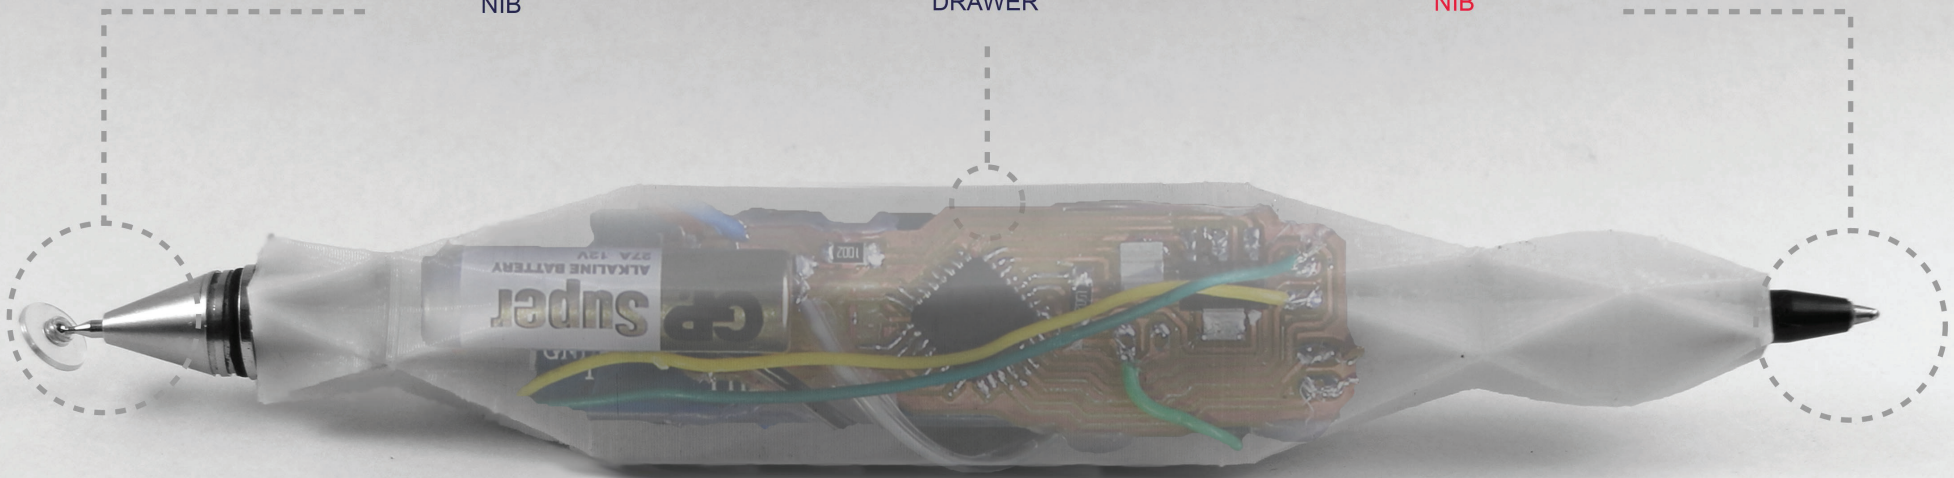

**BITS  
NIB**

**SPATIAL  
DRAWER**

**ATOMS  
NIB**

**BITS NIB** allows you to interact with touch screen digital devices with really good precision.

**SPATIAL DRAWER** integrate a 3D tracking sensor and Bluetooth module that let you draw digitally in 3D and convert them into Gcode in order to control different digital fabrication machines.

**ATOMS NIB** is one of the most common tools that almost everyone uses to communicate ideas and express themselves.

by Roberto Gallo

## BITS

*Nib  
Touch*

*Spacial  
Drawer*

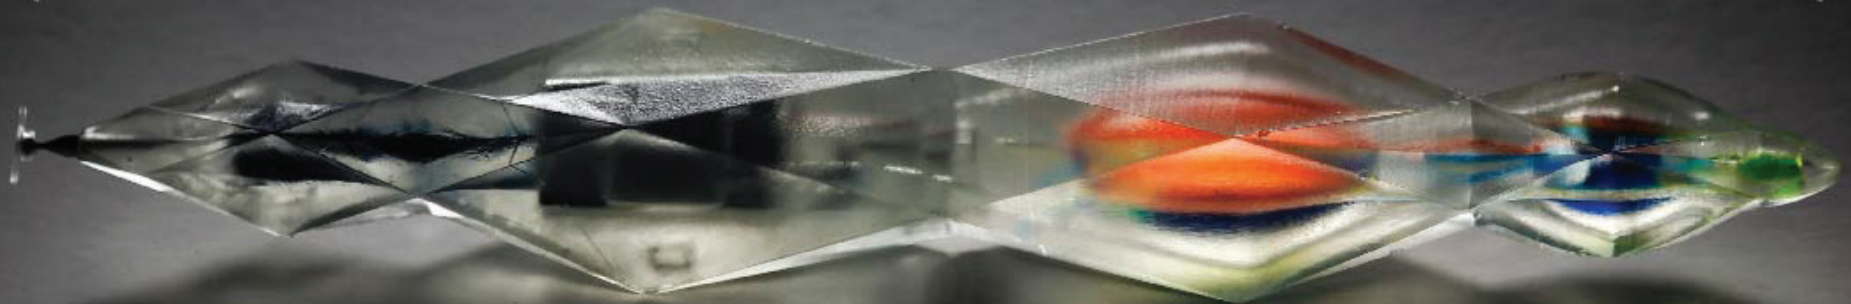

*Micro  
processor*

## ATOMS

*Bacteria  
containter*

*Protein  
container*

*Nib  
mixer*

BAP is a complete tool to express, design and fabricate your ideas. It's inspired in "Bits and Atoms" concept, ergonomics and Nephila Clavipes spider. It's designed to bring an intuitive interface between humans and technology and all the benefits of digital fabrication and bio fabrication. This pen has the ability to generate its own ink thanks to bacteria that keep alive inside it. Also its microprocessor allows to generate any color by precisely mixing primary color inks produced by its bacteria. At the same time it generates information of its movement and mixtures of materials that allows you to work simultaneously with "bits and atoms".

# 2017

- + Working prototype
- + Draw vectors
- + Bluetooth 0.4
- Non real-time
- Difficult to use
- Battery problems

User

Computer

CNC

**2018**  
**(Grow with Fab)**

- + App working
- + Easier to handle
- + Research

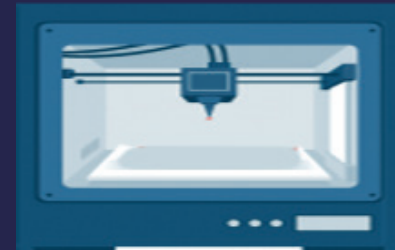

- + Battery solved
- Delay
- Compatibility

User

Smart Device

CNC

# 2019 (Grow with Fab)

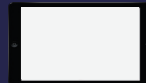

- + Intuitive
- + Low level prog

- + Real -Time
- + Easy to use
- Scale

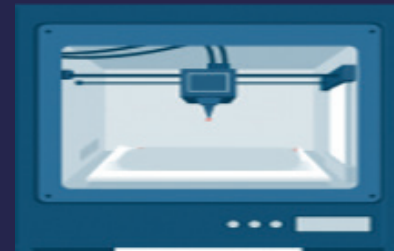

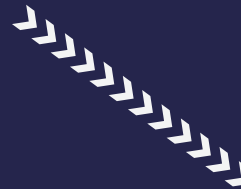

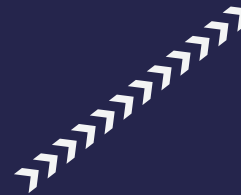

## Computer

## User

Digital  
Switch

## CNC

It will be launched  
at...

FAB 15

# Conclusions

- 1.- Spiral Development is the best tool
- 2.- Find the starting spiral is crucial
- 3.- Machines need to be adapted to people
